

Biocide Effectiveness Test

Capability Statement

Biocides are essential for controlling harmful microbial growth and ensuring asset integrity, safety, and quality in industry operations.

Ineffective biocide selection can lead to pervasive issues like Microbiologically Influenced Corrosion (MIC). Our thorough testing and analysis identifies the most effective biocide regime for your specific conditions, guaranteeing efficient and effective treatment.

Key features:

- ✓ Process-specific
- ✓ Biofilm killing efficacy
- ✓ Choice of substratum material
- ✓ Field-specific conditions
- ✓ Field-specific microorganisms
- ✓ Advanced biofilm assessment

TECHT Contract Laboratory offers top-tier testing services. Our facility meets the latest Australian and international standards, ensuring safety, efficiency, and quality in every test. Trust BioTECHT for reliable and accurate results.
